

Vi-Spring & Princess Yachts

March 06, 2010

Vi-Spring believe that "sleeping on the right bed can be a truly life-changing experience." The luxury brand has now been selected by Princess Yachts to design and create handmade, pocket sprung mattresses for its entire range of motor yachts. "We're looking forward to working together to provide Vi-Spring comfort on Princess Yachts", says Mike Meehan, Managing Director of Vi-Spring.

Each mattress has to be designed specifically for each room. The size, shape and depth are considered to create individual mattress, so that they complement each cabin, with spring requirements based on each customer's individual requirements. Every mattress is upholstered using the finest-quality natural fillings, including lambswool and cotton, materials renowned for their durability and sumptuous feel.
