

Clarke's Transport Chooses Bandvulc for Fleet Fitment

November 26, 2010 02:25:00 PM

Privately owned multi-service transport organisation Clarke's Transport has selected the Bandvulc range of tyres as policy fitment for its fleet operation. The arrangement sees the Clarke's fleet using AC Tyres based in Oldham to manage and provide fleet support to its Northern based vehicles. AC Tyres is a certified member of Bandvulc Tyre Contracts' Service Provider Recognition Scheme and a key partner for Bandvulc.

"Following a factory visit to the Bandvulc operations with AC Tyres I'm confident that their products will provide an effective, high performing solution for our fleet profile, along with their impressive call centre facilities for our drivers and fleet managers," commented Bill Clarke, commercial director at Clarke's Transport. "In addition to this, being in the hands of a fully accredited service provider such as AC Tyres assures us that we will be able to focus on other key tasks whilst our fleet is managed efficiently."

AC Tyres' Wayne Williams added that "our partnership with Bandvulc brings benefits for both organisations and provides Clarke's with efficient reliable service, teamed with Bandvulc's quality products and 24/7 national tyre support. By working closely with Jim Beddall of Bandvulc we have been able to tailor this solution specifically for Clarke's and call upon facilities which are industry leading."
